Team Kanban Practitioner (TKP)

Duration
1 day

Training objective

Learn core concepts of the Kanban Method. Design and implement a task board on the single-team level.

Description

Kanban is a method of organizing and managing professional services work. It uses Lean concepts such as limiting work in progress to improve results.

A Kanban system is a means of limiting work-in-progress and signaling the capacity to start new work. This is known as a “pull system.”

For intangible goods — invisible work performed by knowledge workers — it is necessary to visualize a Kanban system using a Kanban board. The board can visualize the work, its workflow, the kanban system, plus various business and delivery risks. Kanban facilitates handling complex work and allows real control of the workload.

Learning objectives

- Understand the core concepts of the Kanban Method
- Learn the 4 types of Team Kanban systems and when each is appropriate
- How to run daily Kanban meetings
- How to proceed to the next level with Kanban

Benefits

Become faster and more responsive, with better risk management and governance. Earn the Team Kanban Practitioner (TKP) certification, an industry-recognized credential.

Syllabus

- Introduction to Kanban
- Evolutionary Change
    - Principles & Practices
- Feedback Loops
    - Standup Meeting
- Kanban Boards
    - Ticket Design
    - Personal/Team Boards
- Kanban Systems
    - WIP Limits / Pull System
    - Classes of Service
    - Work Item Types

Team Kanban Practitioner (TKP)

Target audience

Team members and managers who want to understand key concepts in Kanban and get started.

Pre-requisites

All experience levels are welcome. No previous Kanban training or experience is required.

Licence

Lean Kanban University classes teach steps to guide you through the Kanban Method and model your work using Kanban. The Team Kanban Practitioner training is offered by Pyxis under license from the Lean Kanban University.
